VALTTI PROTECTS WOOD SURFACES

Sun and moisture are merciless on wood surfaces. Mould and blue annealing fungus thrive on untreated surfaces and cause unsightly discolouration. Therefore you should prime wood and protect it as early as possible during construction. Maintenance treatment should also be done on time. The Valtti product family offers suitable treatments from top to bottom. The products protect wood efficiently against weathering.

VALTTI AKVABASE

*Natural oil-based, modern wood primer
that is absorbed into the wood, for outdoor use*

- water-borne
- slows down moisture absorption and improves the performance of the whole coating system.
- Used for: the priming of logs, sawn and planed timber, thermally modified and impregnated wood outdoors prior to surface treatment
- colourless

VALTTI POHJUSTE

Oil-based, traditional wood primer that is absorbed into the wood, for outdoor use

- solvent-borne
- slows down moisture absorption and improves the performance of the whole coating system.
- Used for: the priming of logs, sawn and planed timber, thermally modified and impregnated wood outdoors prior to surface treatment
- colourless

VALTTI AKVACOLOR

*Natural oil-based, tintable translucent
wood stain for outdoor use*

- water-borne
- easily absorbed into the wood
- slows down moisture absorption
- Used for: exterior walls, fences
- Suitable surfaces: logs, sawn and planed timber, impregnated and thermally modified wood
- To be tinted before use
- colours: Valtti colour card

VALTTI COLOR

*Oil-based, tintable translucent
wood finish for outdoor use*

- solvent-borne
- easily absorbed into the wood
- slows down moisture absorption
- Used for: exterior walls, fences
- Suitable surfaces: logs, sawn and planed timber, impregnated and thermally modified wood
- To be tinted before use
- colours: Valtti colour card

VALTTI ARCTIC

*Natural oil-based, tintable
pearl stain for outdoor use*

- water-borne
- slows down moisture absorption into the wood
- Gives the wood a pretty pearly sheen
- Used for: exterior walls, fences, milieu construction
- Suitable surfaces: logs, sawn and planed timber, impregnated and thermally modified wood
- To be tinted before use
- colours: Arctic colour card

VALTTI COLOR EXTRA

*Oil-based, tintable
translucent wood stain
for outdoor use*

- solvent-borne
- a gloss finish protects the wood from weathering
- slows down moisture absorption into wood
- Used for: board-clad walls, fences, doors, windows
- Suitable surfaces: sawn and planed timber, impregnated and thermally modified wood
- To be tinted before use
- colours: Valtti colour card

VALTTI COLOR SATIN

*Oil-based, tintable
satin-matt wood finish
for outdoor use*

- solvent-borne
- gives a satin-matt protection for the surface
- slows down moisture absorption into the wood
- Used for: exterior walls, fences, window frames, doors
- Suitable surfaces: logs, sawn and planed timber, impregnated and thermally treated wood
- To be tinted before use
- colours: Valtti colour card
