SUPI SAUNA PRODUCTS

For a unique ambience

With Supi products you create an inviting ambience in your sauna and protect the wood surfaces beautifully. Also your sauna will stay easy to clean for a long time. The Supi product family includes suitable products for sauna benches, panelled walls and ceilings as well as wooden floors.

SUPI FLOOR OIL

Protects the wooden sauna floors and other wooden floors and grates in humid rooms.

Supi Floor Oil is a water-borne tintable wood oil emulsion based on natural oil derivatives for interior use. The product is easy to apply and it dries quickly. One coat is normally sufficient. Supi Floor Oil protects the wood from moisture and dirt, and retards cracking of the wooden surface.

Supi Floor Oil can be used for protecting bare wood or previously oil-treated wood in humid premises. It is suitable also for thermally treated wood or hardwood. Supi Floor Oil has M1 certificate.

Supi Floor Oil can be tinted according to the Interior Wood Stains and Lacquers color card.

Coverage: 8–15 m²/l

HOW TO SUCCEED

PRE-TREATMENT

New bare wood surfaces

Clean dirt and dust off the wood surface and lightly mist it with water. Leave to dry and sand off the loose wood fibers. Remove the sanding dust.

Old and previously oil-treated surfaces

Wash with Supi Saunapesu Cleaning Agent as instructed, rinse thoroughly and let dry. Sand the surface if necessary and remove sanding dust. Use scraper or steel brush to remove the loose material from the surface. Remove any film from the surface before the treatment.

APPLICATION

Mix Supi Floor Oil thoroughly before use and occasionally also during use.

Apply one layer of floor oil tightly with a brush or sponge so that all oil is absorbed into the wood evenly. Treat surface without interruption and one board at a time in order to achieve an even color. Wipe off any unabsorbed oil after approx. 30 minutes. Oil treatment makes wood darker.

Pre-heat the sauna and ventilate it well before use.

Make the maintenance treatment when necessary. Surfaces exposed to continuous humidity will require the maintenance treatment regularly.

SUPI SAUNA WAX

Natural protection for sauna benches and other wood surfaces in the sauna.

Colorless

Can be tinted or used colorless if a transparent finish is desired

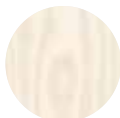

Gray

A ready-mixed finish that reminds the original color of deadwood.

Black

A ready mixed finish that creates an ambience of a smoke-sauna

White

A ready-mixed finish that preserves the color of light wood

Supi Sauna Wax is a water-borne protective finish containing natural wax for the treatment of wood surfaces in the sauna. The product is absorbed into the wood and leaves it with a naturally light, silky matt protective finish. It is suitable for treating sauna benches, panel walls and ceilings as well as doors and window frames.

Supi Sauna Wax is available in three ready-mixed colors: Black, White and Gray. Supi Sauna Wax can be tinted to any color of the Interior Wood Stains and Lacquers color card 3441-3451 marked with an asterisk (*).

Coverage: 10–13 m²/l

Note! TVT 318R is a beautiful and durable color for thermally treated wood.

SUPI ARCTIC

New, clean shine for the sauna

Supi Arctic is a water-borne sauna finish containing pearlescent pigment for the treatment of walls and ceilings in steam rooms, washrooms and dressing rooms in the sauna.

Tintable Supi Arctic can provide your sauna surfaces with the silky gray shade of old deadwood or the glistening black of a charred log, straight from nature. There are ten pearly color options to choose from in the Arctic color card.

Coverage: 8-12 m²/l

Supi Arctic contains slightly glittering pearlescent pigments

SUPI SAUNAPESU CLEANING AGENT

For effective cleaning

Supi Saunapesu Cleaning Agent desinfects without chlorine and effectively dissolves lime scale deposits. The acidic cleaning agent is suitable for the cleaning of wood, metal and tile surfaces in the sauna and other wet areas. Mix 1–2 dl of Saunapesu in 5 litres of water, depending on the dirtiness of the surface.

SUPI SAUNA BENCH PROTECTION

Protects against dirt and moisture

Supi Sauna Bench Protection is a paraffin oil that protects both untreated and previously with bench protection treated wood surfaces from moisture and dirt. The Sauna Bench Protection is absorbed into the wood, leaving the surface looking natural. Supi Sauna Bench Protection deepens the wood's natural color differently depending on the type of wood.

Coverage: 8-15 m²/l

SUPI SAUNA FINISH

For wet areas

Supi Sauna Finish is a water-borne protective finish for treating the wall and ceiling panels of steam rooms, washrooms and dressing rooms. It creates a film that repels dirt and water. Supi Sauna Finish contains fungicides protecting the wood from mold. Can be tinted with colors from the Interior Wood Stains and Lacquers color card.

Coverage: 8-12 m²/l
